Bijan Chokoufe Nejad From Zero to Hero —

June 14, 2017

Note: - How close are we to ninja?

Why do we need version control?

Two problems 1. Errors - E.g. `rm -r src` instead of `rm -r build` - Might want to go back in time when some feature of your program still worked 2. Collaboration - Ever tried to work on the same document with 5 different people at the same time in Dropbox, GoogleDrive, OneDrive, NameYourCloud?
